

Episode 9: CARBON SINKS -- OCEANS

QUESTION: What can we do to protect our oceans?

Activity 1: Oceans

Draw 6 of your favorite thing about our oceans. It can be something that is alive, the waves, currents that move products to sell or buy, or something delicious.

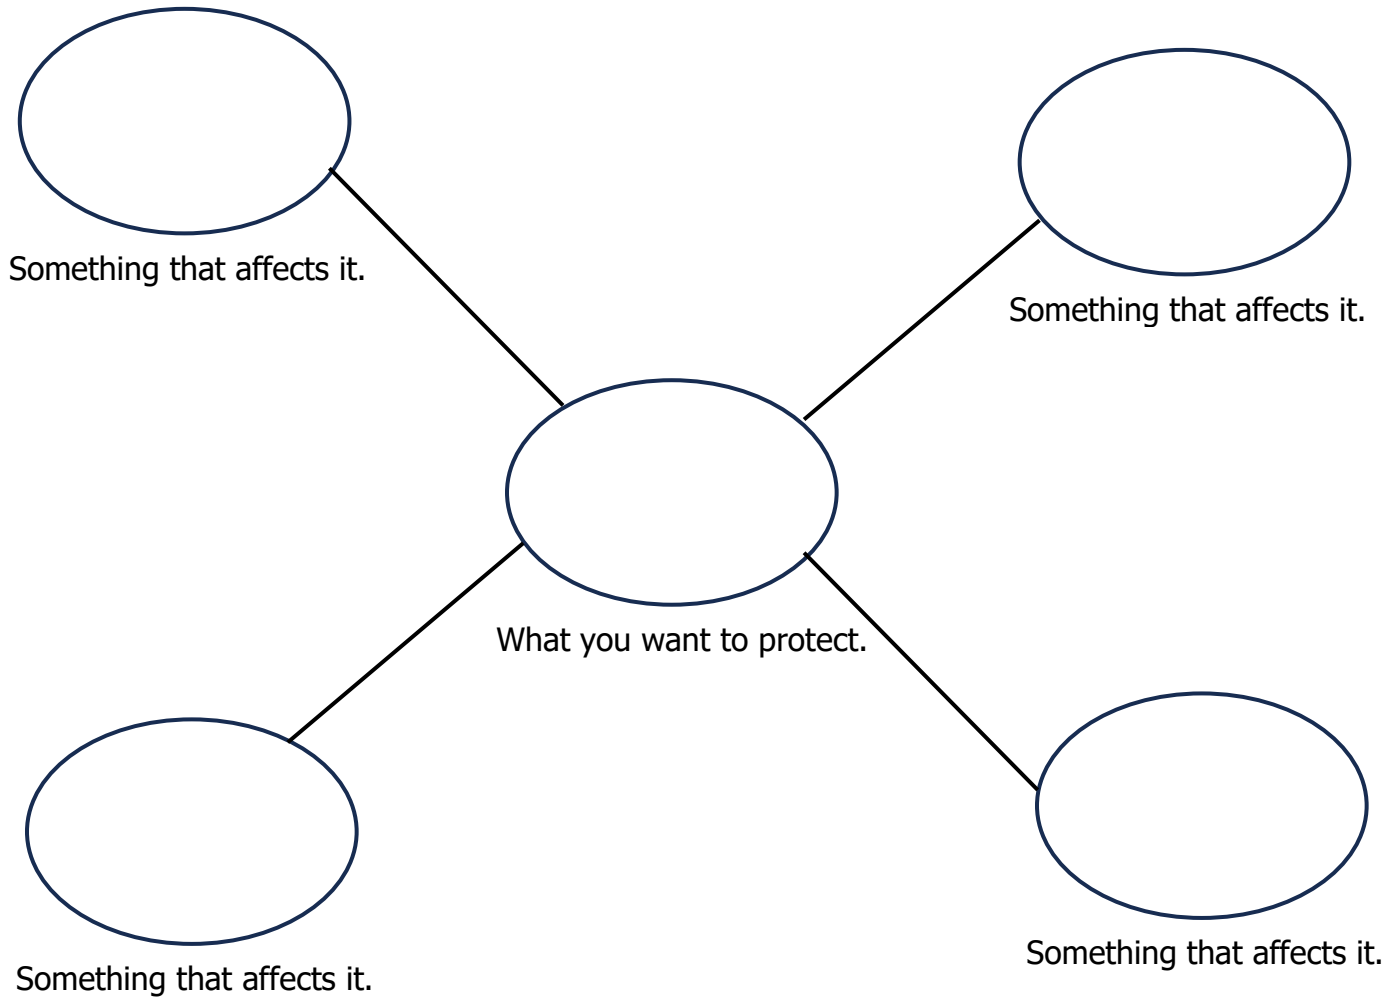

You can find easy ways to draw icons at <https://thenounproject.com/>

Share drawings with others in your class. If you want to, you can redraw any icons that you see differently after sharing, or add 2 more icons below:

--	--

Activity 2:

It's been said that we only protect what we love. Choose one of the things in your list from Activity a. Brainstorm about the things that affect it. By protecting what affects it, we can protect the thing itself. You may have to do some research to find what affects it. Remember from Episode 9 that excess CO2 is causing the ocean to become more acidic and warmer. Could either of those affect the thing you love?

Protecting our oceans is not a job for one person alone. Find 3 organizations that are that are working to protect our oceans.

1. _____
2. _____
3. _____

Write a letter or email to one of the organizations, thanking them for their work.
